📄 Summary

Senior Full Stack Developer with over 10 years of experience designing, building, and scaling robust web applications. Expert in aligning frontend user experiences with powerful backend architecture. Proven track record of driving end-to-end development lifecycles, optimizing system performance, and collaborating across teams to deliver high-impact software solutions.

📁 Work Experience

Codexa 🔗

Senior Full Stack & Systems Engineer

06/2025 – Present | Lima, Peru

- **Architected and engineered** the core full-stack architecture for a scalable Software-as-a-Service (SaaS) platform from inception, utilizing high-performance backend frameworks.
- **Designed and integrated intelligent AI Agent workflows**, leveraging local language models, self-hosted orchestration frameworks, and secure API gateways to automate complex system behaviors.
- **Provisioned, secured, and maintained** bare-metal and virtualized Linux production servers, configuring automated deployment pipelines, reverse proxies, and server-level caching to maximize uptime.
- **Optimized data layer efficiency** by designing secure, low-latency RESTful APIs and highly index-optimized database schemas capable of handling heavy concurrent multi-tenant loads.
- **Implemented rigorous security protocols**, including automated patch management, vulnerability scanning, and isolated environment configurations across the infrastructure stack.

Plan Left 🔗

Senior Web Developer

10/2014 – 07/2026 | Tennessee, USA (Remote)

- Mentored and coached junior engineering talent, establishing rigorous code review standards that elevated overall repository health and team velocity.
- Spearheaded front-end performance optimizations and robust caching strategies, substantially reducing page load times and server response friction.
- Enhanced website security by identifying vulnerabilities, applying patches, and regularly updating software components.
- Integrated third-party APIs to add valuable functionality and improve overall user satisfaction with web applications.
- Developed responsive web designs for seamless user experience across multiple devices and platforms.
- Reduced server response times by implementing performance-enhancing back-end solutions and database optimizations.
- Participated in code review sessions to maintain codebase integrity and promote knowledge sharing among team members.
- Performed routine maintenance tasks for existing websites, ensuring optimal performance at all times while minimizing downtime risks.
- Implemented version control systems to track changes efficiently, enabling streamlined collaboration on projects.

Skills

Backend / Architecture

PHP (Drupal custom module/theme development, WordPress plugin development), Python, MySQL/MariaDB database management, AI Agent Integration, LLM Orchestration

Frontend

JavaScript, jQuery, HTML5, CSS3, Responsive & Mobile-First Web Design

CMS & Frameworks Ecosystems

Drupal, WordPress, Laravel

DevOps & Infrastructure

Linux Server Management (Bare-metal & Virtualized Environments), Git, GitHub, Bitbucket, Gitlab, Self-Hosted AI Gateway Infrastructure, Docker, DDEV, Bitbucket Pipelines

Tools / Methodologies

JIRA, Confluence, Technical Writing, Agile/Team Collaboration

Languages

Spanish

Native language

English

- C1
- Proficient

- Delivered high-quality documentation for developers, administrators, and end-users to support the ongoing success of projects.
- Maximized site reliability through thorough testing, debugging, and proactive resolution of identified issues.
- Championed mobile-first design principles within the organization, leading the adoption of progressive web applications and responsive design techniques.
- Architected and delivered scalable enterprise web applications leveraging **PHP**, **Drupal**, and **WordPress**, ensuring high-performance code quality across full-stack implementations.

BettyBets

Full Stack Developer

03/2021 – 05/2025 | Buenos Aires, Argentina (Remote)

- Reviewed code, debugged problems, and corrected issues.
- Designed and deployed robust backend systems, optimizing MySQL database architecture and secure RESTful API integrations to support high-traffic web applications.
- Integrated third-party APIs to enhance functionality and improve overall user experience on web platforms.
- Reduced page load times by optimizing front-end assets such as JavaScript files, stylesheets, and images.
- Enhanced user experience by developing and implementing responsive front-end interface for web applications.
- Maintained clear documentation of system architectures, workflows, and coding standards for reference by other team members.
- Provided software application engineering and maintenance for development lifecycle.
- Troubleshoot and resolved complex technical issues, maintaining optimal system performance and uptime.

DRLP.net

Web Developer & Systems Administrator

01/2011 – 08/2017 | Lima, Peru

- Enhanced user experience by implementing responsive web design and optimizing website performance.
- Developed custom web applications, resulting in tailored solutions for client needs.
- Migrated websites to new platform to minimize downtime and maintain seamless user experiences.
- Ensured cross-browser compatibility by utilizing progressive enhancement techniques that allowed for optimal display on a wide range of devices.
- Reduced load times and improved site speed by optimizing images, scripts, and other assets.
- Resolved technical issues promptly, ensuring minimal disruption to website performance and user satisfaction.
- Streamlined website maintenance tasks for increased efficiency and improved site functionality.

- Coded websites using PHP, HTML, CSS, JavaScript, and jQuery languages using PhalconPHP as the primary framework.

SoftBrilliance S.A.C

Junior Web Developer

05/2014 – 11/2014 | Lima, Peru

- Developed aesthetically pleasing websites through the use of HTML, CSS, and responsive design principles.
- Built website interfaces with HTML and CSS.
- Utilized version control systems such as Git to maintain organized code repositories and facilitate team collaboration.
- Oversaw technical issues and troubleshooting requests to resolve user problems.
- Developed page layouts and navigation tools that met or exceeded user expectations.

iMailUnlimited LLC

Junior Systems Administrator & Developer

01/2012 – 04/2014 | California (Remote)

- Engineered a custom automation control panel using PHP (CodeIgniter) that utilized secure SSH integrations to programmatically provision and configure remote environments.
- Architected automated server virtualization pipelines, deploying and managing Linux Containers (LXC) to isolate high-performance messaging instances.
- Configured, hardened, and optimized enterprise-grade SMTP infrastructure and PowerMTA software tailored for scalable, high-volume email marketing delivery.
- Developed custom backend API integrations and coded cross-platform email templates to maximize delivery reliability, rendering performance, and inbox success rates.

Digital Networks del Perú S.A.C

Web Developer & Systems Administrator

01/2006 – 01/2012 | Lima, Peru

- Enhanced client satisfaction by delivering high-quality work within deadlines.
- Collaborated with clients to define project requirements and deliverables.
- Adapted quickly to changing project requirements, demonstrating flexibility and adaptability under pressure.
- Developed customized web solutions to address distinct business requirements, driving long-term client retention and contract renewals.
- Managed multiple projects simultaneously while maintaining a high level of attention to detail and organization.
