📄 Summary

Full Stack Web Engineer with over a decade of hands-on experience building custom web platforms with WordPress, Drupal, and Laravel, backed by solid Linux system administration skills. Specializes in custom theme and plugin engineering, API integrations, and server management, using AI productivity tools to ship clean code faster.

📁 Work Experience

Codexa

Senior Full Stack & Systems Engineer

06/2025 – Present | Lima, Peru

- **Architected and built custom web applications** and client platforms using modern PHP (Laravel, WordPress, Drupal, FilamentPHP), leveraging ACF Pro, Gutenberg/Block Editor components, Elementor, Divi, and strict WCAG accessibility standards.
- **Engineered custom WordPress plugins** and REST API integrations to automate data workflows, connect third-party platforms, and extend native admin functionality.
- **Provisioned and maintained bare-metal and virtualized production servers** across Debian, Ubuntu, CentOS, and RHEL, managing server-level caching, PHP/MySQL performance tuning, and automated deployment pipelines.
- **Integrated autonomous AI agent workflows** and custom tooling into daily engineering routines to augment productivity, speed up code auditing, and consistently deliver complex features ahead of schedule.
- **Executed complete infrastructure security** and site reliability practices, including staging-to-production deployment pipelines, CI/CD pipelines, automated backups to Amazon S3, and server hardening.

Plan Left

Senior Web Developer

10/2014 – 07/2026 | Tennessee, USA (Remote)

- **Handled full-lifecycle web development** across dozens of client platforms using WordPress and Drupal, translating Figma mockups into pixel-perfect custom themes built from scratch, Gutenberg block layouts, ACF Pro structures, and page builders like Divi and Avada.
- **Engineered custom PHP plugins and REST API integrations** to automate data workflows, including non-public real estate inventory syndication feeds, custom Mautic marketing pipelines and deep API integrations, and GoHighLevel automation integrations.
- **Developed custom WordPress plugins, shortcodes, Drupal modules, Drupal and WordPress themes and Gutenberg blocks** to extend core functionality, while leveraging ACF to create custom backend configuration pages for on-the-fly functionality adjustments and integrating Sucuri across client environments.
- **Optimized sites for high Core Web Vitals scores** and search engine visibility by auditing performance baselines with PageSpeed Insights and GTmetrix.
- **Managed server infrastructure**, staging environments, CI/CD pipelines, DNS records, and SMTP configurations to ensure reliable deliverability, seamless database migrations, and maximum uptime.

Skills

CMS & Ecosystems

- **WordPress:** Custom Theme & Plugin Development, ACF Pro, Block Editor / Gutenberg, WP REST API, Divi, Elementor, Avada, Core Web Vitals Optimization
- **Drupal:** Drupal 7/8/9/10, Custom Module & Theme Development, Views, Twig

Languages & Frameworks

- **PHP:** PHP, Laravel, FilamentPHP, PhalconPHP, CodeIgniter
- **Frontend:** JavaScript (ES6+), jQuery, HTML5, CSS3/SCSS, Tailwind CSS, Responsive Design
- **Databases:** MySQL, MariaDB

DevOps & Systems Administration

- **Linux Administration:** Debian, Ubuntu, CentOS, RHEL, Server Hardening
- **Web & Infrastructure:** Nginx, Apache, cPanel, DirectAdmin, Bare-Metal & Virtualized Environments, Docker, LXC
- **Network & Mail:** DNS Management, SMTP Infrastructure, PowerMTA
- **Tools & CI/CD:** Git, GitHub, GitLab, Bitbucket Pipelines, Docker, DDEV, Amazon S3, Amazon SES

AI Engineering & Productivity

- **AI Tooling & Workflows:** Claude Code, Antigravity, Gemini, Perplexity, Hermes Agent

Standards, Testing & Quality Control

- **Static Analysis & Formatting:** PHP_CodeSniffer (phpcs), PHP Code Beautifier (phpcbf), PHPStan
- **Testing & Automation:** Cypress, PHPUnit, Ghost Inspector
- **Web Standards & Performance:** WCAG / Web Accessibility, GTmetrix, PageSpeed Insights

- **Mentored junior developers** and led code reviews to maintain clean codebase standards, optimal security, and WCAG accessibility compliance across all client deliverables.

BettyBets

Full Stack Developer

03/2021 – 05/2025 | Buenos Aires, Argentina (Remote)

- **Owned the full-lifecycle development, hosting, and ongoing maintenance of all public marketing websites** and campaign landing pages, built across WordPress and Drupal platforms.
- **Maintained and extended core features** within an active production Laravel codebase for an event-based betting platform, writing clean code and resolving backend application bugs.
- **Managed server infrastructure and hosting environments** for both the Laravel web application and marketing sites, ensuring uptime, executing software patches, and managing database backups.
- **Refactored front-end assets, JavaScript files, and stylesheets to reduce page load times** and improve cross-device responsiveness.

DRLP.net

Web Developer & Systems Administrator

01/2011 – 08/2017 | Lima, Peru

- **Architected and maintained the web platform for a high-traffic gaming community** serving 50k–100k unique monthly visitors with high concurrent user sessions, leading a complete codebase migration from Drupal to PhalconPHP (PHP MVC) to reduce server costs by nearly 70%.
- **Built responsive, dynamic user interfaces** using HTML5, CSS3, JavaScript, and jQuery, ensuring cross-browser compatibility and smooth performance.
- **Managed bare-metal and virtualized Linux server infrastructure**, handling continuous monitoring, CI/CD pipelines, live site migrations, patch management, and zero-downtime deployment pipelines.

SoftBrilliance S.A.C

Junior Web Developer

05/2014 – 11/2014 | Lima, Peru

- **Built custom-coded WordPress websites** and page templates using HTML, CSS, JavaScript, and PHP, avoiding page builders to maintain clean markup.
- **Implemented basic custom theme functionality**, form integrations, and routine site updates based on client requirements.
- **Performed front-end quality assurance**, form testing, and content entry across multiple client environments while managing code via Git repositories.

iMailUnlimited LLC

Junior Systems Administrator & Developer

01/2012 – 04/2014 | California (Remote)

- **Engineered a custom automation control panel using PHP** (CodeIgniter) and SSH integrations to programmatically provision and configure remote Linux servers.
- **Configured, hardened, and optimized enterprise-grade SMTP** infrastructure and PowerMTA for high-volume email delivery platforms.
- **Managed automated server virtualization pipelines using Linux Containers (LXC)** to isolate high-performance messaging instances.

Digital Networks del Perú S.A.C

Web Developer & Systems Administrator

01/2006 – 01/2012 | Lima, Peru

- **Built and maintained custom web applications and CMS platforms** using CodeIgniter, Joomla, and Drupal for local businesses and government clients, including municipal districts.
- **Managed web server environments and client hosting infrastructure** using cPanel and DirectAdmin, handling domain setups, database administration, and site deployments.
- **Worked directly with stakeholders** to gather technical requirements, scope deliverables, and maintain ongoing system operations across diverse web properties.

Education

Associate of Science: Computer Engineering Technology

ISIL

Lima, Peru

Professional Web Designer: Web/Multimedia Management And Webmaster

National University of Engineering

Lima, Peru

Linux Expert: Computer Technology/Computer Systems Technology
